

**Title: Procedure for Obtaining Certificate of Conformity
COC for Marine Construction Works**

1.0 Purpose

The purpose of this procedure is to describe and outline the method, how the client working on Dubai World Developments will apply & obtain COC for Marine Construction Works.

2.0 Scope

This procedure will apply to the contractors involved in the Marine Construction Works for all Dubai World Developments.

3.0 Procedure to be followed

3.1 All Marine Construction works carried out in areas under the jurisdiction of PCFC Environment, Health & Safety must take into account the requirements of EHS regulations and standards. In order to ensure that this is the case EHS have Certificates of Conformity that must be obtained at the appropriate time. This will also enable the main contractor to obtain the necessary NOCs from the Civil Engineering Department (CED).
The flow charts provide a step by step guide to ensure that all parties are familiar with the process and can make the necessary applications.

3.2 Certificate of Conformity – COC

Application for COC must be made by the Main Contractor and / or of the Marine Construction Works. Application must be made after the site has been established but before starting any site activities.
